

PACKAGE YOUR PRODUCE WITH AN IMPRINTED PLU BAND

We have always worked closely with growers to make sure our products meet your needs in size, quality, stretch and changing industry requirements. We were the first to recognize the need for PLU Bands and, now, "COOL", country of origin labeling requirements. PLU Bands are available to cover a wide range of produce and rubber bands have distinct advantages over poly bags and twist ties.

The Differences:

- Rubber bands allow the consumer to see and touch the produce to determine freshness.
- Rubber bands will not leave brown water spots.
- Rubber bands will not leave a rust stain on produce and will not disintegrate with misting.
- Rubber bands will not cut into produce.
- Rubber bands will shrink with produce, as moisture is lost, providing a fresher appearance.
- Rubber bands are biodegradable and reusable.
